# OUR GOALS

---

Kesatria Holding together with its subsidiaries will hold several more collaborations with higher education centers for agricultural research projects also government in empowering the agricultural sector, especially the palm oil sector, to achieve the Sabah Government's policy goals with initiative to make the state a global leader in the sustainable palm oil industry.

With the existing business activities that are being carried out along with the cooperation that has built up various direct procurement channels, established an alliance type cooperation platform with palm oil company (oil palm mill, FFB Collecting Centre, Plantations, etc), transportation company, port warehousing, associations and government, Kesatria Holding is always open for any opportunity of comprehensive collaboration in international level along to achieve a win-win situation of environmental and economic value.

# OUR PROJECT

Until today, the profit enjoyed by the company has been reached up which also allows this company to contribute to a project with Eco Farm UMS (University Malaysia Sabah) to carry out a study of the application of additional trace elements to soils to improve oil palm yield, soil health, and soil fauna diversity.

The aim of this study is to improve soil nutrient management in oil palm agroecosystems through better holistic and sitespecific information and extension to oil palm planters, with an emphasis on sustainability indicators such as soil trace element enrichment and cost effectiveness. This can help oil palm planters underpin MSPO or RSPO certification.

KESATRIA HOLDING

# OUR PROJECT

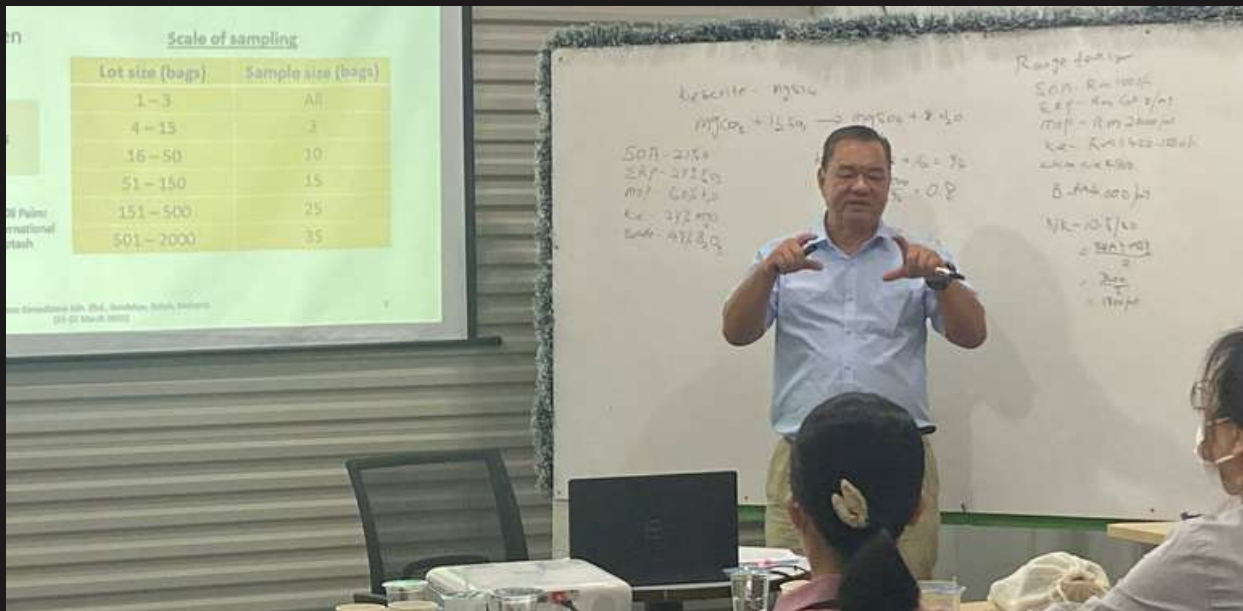

**MSPO 2.0 TRAINING**  
October 2022

# OUR PROJECT

## FERTILIZER USAGE IN OIL PALM March 2023

KESATRIA HOLDING

# OUR PROJECT

## SUSTAINABLE COCONUT CULTIVATION June 2023

# OUR PRODUCT

## MAMPAN SERIES

### N+pH Plus

Neutralizing the pH value of the soil, the recommended application is 2Kg for each tree per year

### M2 Plus

Encouraging new roots to grow, growing oil palm seeds, treating yellowing and curling leaves

# OUR PRODUCT

## MAMPAN SERIES

### M3 Special

Promotes flowering, enlarges oil palm seeds, treats yellowing and curling leaves

### M6 Plus

Increases the weight of the fruit bunches, enlarges the size of the fruit bunches, and treats yellowish leaves

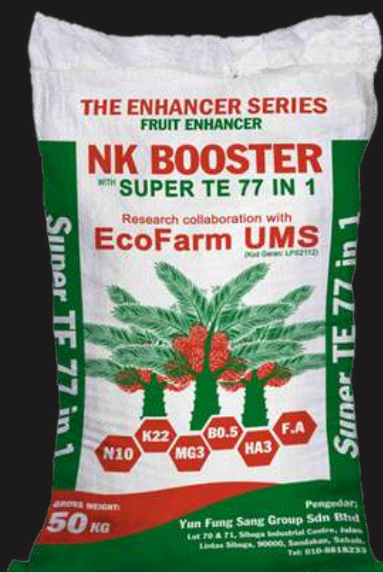

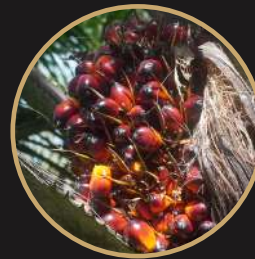

# OUR PRODUCT

## BOOSTER SERIES

### PhosMagB Booster

Contain Phosphorus, Magnesium, and Boron for flowering enhancer, which is designed to promote the flowering of palm trees

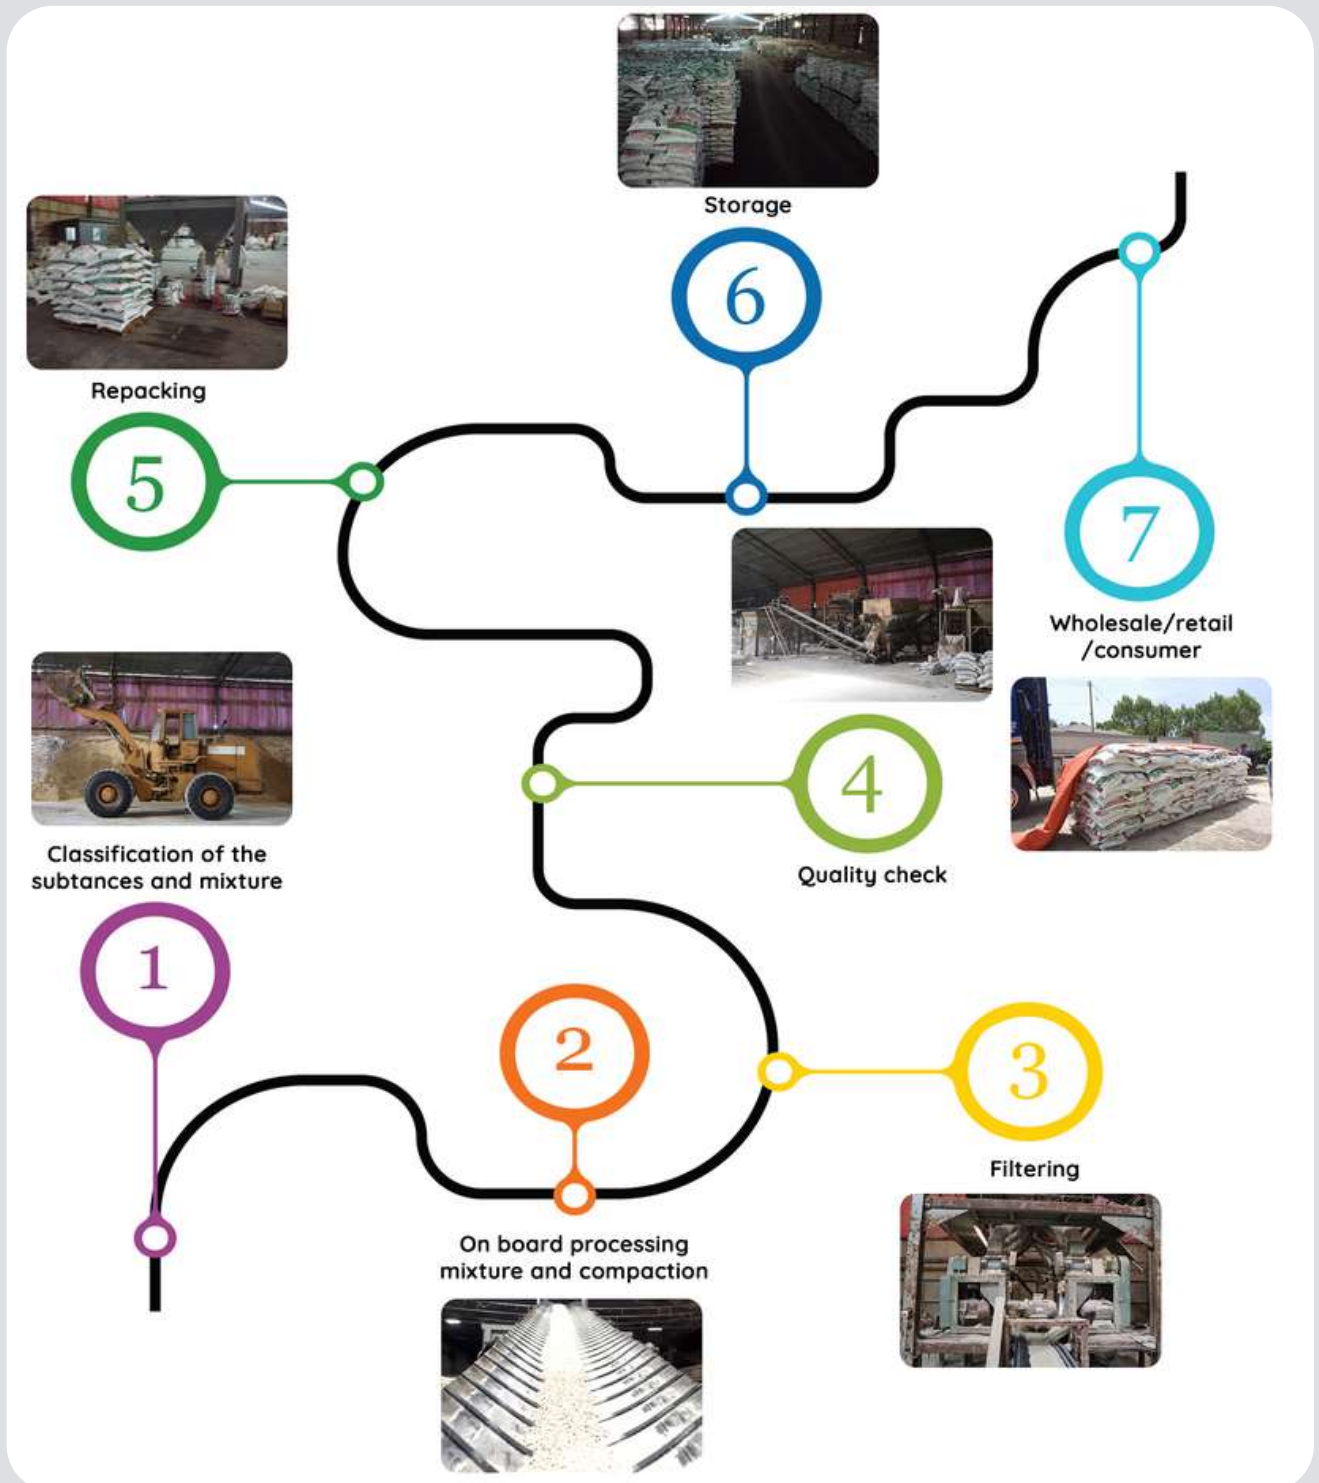

### NK Booster

Contain Humic Acid and Fulvic Acid to improve soil structure, improve the yield quality, stimulate physiological metabolism and retain cation to reduce leaching and surface runoff

# FERTILIZER PRODUCTION

## PRODUCT OF YUN FUNG SANG GROUP SDN BHD

### Export

Each company brings its own product, leading product as a way to sell their goods to other businesses instead of marketing directly. Yun Fung Sang Group Sdn Bhd is also interested in exporting those items to potential parties.

### Palm Kernel Expeller (PKE)

PKE is a by-product of the palm oil extraction process from the fruit of the palm.

PKE is a quality stock feed containing high levels of crude protein and medium energy levels.

It is completely safe to feed as a supplement for most classes of livestock.

Annual Capacity (Average Tonne/Year): 110,000

### Palm Kernel Shell (PKS)

PKS can be used as an alternative fuel for biomass-based combined heat and power plants to produce heat and power for: Industrial boilers, Furnace & foundries, Brick kilns.

Annual Capacity (Average Tonne/Year): 120,000

## PRODUCT OF YUN FUNG SANG GROUP SDN BHD

### Export

#### Boiler Ash

Boiler ashes were collected from three different sections of a palm oil boiler plant, which included the ash collector, the ash-retention section, and the bottom-boiler section.

Annual Capacity (Average Tonne/Year): 100,000

#### Palm Oil Mill Effluent (POME)

POME is the voluminous liquid waste that comes from the sterilization and clarification processes in milling oil palm.

Annual Capacity (Average Tonne/Year): 100,000

#### Empty Fruit Bunches (EFB)

EFB are a type of mill waste which is very valuable for farmers because they provide nutrients and increase the soil organic matter content of the soil.

Currently, most of the EFBs that come out of the mill as waste are used as an organic fertilizer for oil palms.

Annual Capacity (Average Tonne/Year): 120,000

## PRODUCT OF YUN FUNG SANG GROUP SDN BHD

### Export

#### Lime Stone

Limestone (calcium carbonate  $\text{CaCO}_3$ ) is a type of carbonate sedimentary rock which is the main source of the material lime. It is composed mostly of the minerals calcite and aragonite, which are different crystal forms of  $\text{CaCO}_3$ . Limestone forms when these minerals precipitate out of water containing dissolved calcium.

#### Coral Limestone

Coral Limestone can be used in the mining industry, the cement industry, the sugar industry, ceramic raw materials, building materials, agricultural and road stabilizers.

We are also a suppliers and traders of local products including Edible Bird's Nest.

#### Edible Bird's Nest

## PRODUCT OF YUN FUNG SANG GROUP SDN BHD

### Import

We do import raw materials from China for our customers by supplying factories in order to help them provide high quality products.

**Ammonium Sulphate  
(SOA)**

**Muriate of Potash  
(MOP)**

**Synthetic Kieserite**

**Borate**

**Monoammonium  
Phosphate (MAP)**

## SERVICE OF KESATRIA HOLDING SDN BHD

### Warehouse

We also interesting provides warehouse search services focused on storage and processing, which our company has several business partnerships with companies that sell and rent buildings and warehouses.
